

COURSE EXPECTATION

1. Course Goals:

The course aims to contribute to the establishment of a pool of medical educationists who will be advising medical and allied health faculties in planning, implementing and evaluating medical and allied health programmes at the undergraduate and postgraduate levels.

2. Course objectives:

- Its main objectives are to increase candidates' knowledge, skills and attitudes regarding medical or allied health profession education so as to increase their effectiveness as trainers of teachers.
- To prepare candidates to be able to carry out further responsibilities as academicians, to carry out educational research, planning and evaluation, publish, as well as undertake academic administration and management.
